

ADVANCED JAVA NETWORKING

Nov 27, 2020

[Advanced Java Networking](#)

Advanced Java Networking is designed to present you with a myriad of alternatives to connect your applications to the Internet. It is neither a programming reference nor a marketing brochure. We'll leave that to the geeks and marketers to battle out. Instead, we wanted to explore each alternative without marketing bias or engineering snobbery.

Configure Azure CNI networking in Azure Kubernetes Service (AKS) 06/03/2019; 13 minutes to read +11; In this article. By default, AKS clusters use kubenet, and a virtual network and subnet are created for you. With kubenet, nodes get an IP address from a virtual network subnet. Network address translation (NAT) is then configured on the nodes, and pods receive an IP address "hidden" behind the ...

[How to Create a Chat Console Application in Java using Socket](#)

Even though the Java Networking APIs enable you to open and close network connections via sockets, all communication happens via the Java IO classes InputStream and OutputStream. Alternatively you can use the networking classes in the Java NIO API. These classes are similar to the classes found in the Java Networking API, except the Java NIO API can work in non-blocking mode. Non-blocking mode ...

[Create Your First Application with Java Using Networking](#)

Networking in Java. Java supports both TCP and UDP protocol where TCP is used for reliable connection-oriented, stream-based I/O across the network and UDP is used for fast, unreliable, point-to-point datagram connection. The tag "unreliability" associated with UDP is somewhat an understatement. In practice, data transmission through UDP it is quite reliable and the use of this model should ...
