Your Canon EOS Rebel T3/1100D offers an excellent autofocus system. However, with some subjects (such as
low-contrast scenes, like foggy mornings), autofocus can be slow or impossible, which is why your camera also
offers manual focusing. Make the shift from auto to manual focus as follows: Set the AF/MF switch on the side of
the [...]

[Using Canon EOS Utility To Step Focus - Zerene](#)

Switching from auto-focus to manual focus becomes much easier. Usually you have to flick a switch to MF
otherwise the autofocus would just override it when you pressed the shutter. If you're using the BBF and want to
switch to manual, you can just turn the manual ring on your lens and use the shutter without AF interfering. Filters.
One thing I've found particularly handy with this feature ...

The Canon T50 is an ugly, extremely simple manual-focus film SLR which, nonetheless, is huge fun to use and
capable of getting superb results if you use it properly. You might have one of these kicking around a closet
somewhere, or you might know someone who has one, or you can easily pick one up from eBay for next to
nothing.

[Understanding Canon 5D Mark IV Autofocus – AF Points & AF ...](#)

But first, a common reason the AF system gets damaged is manually overriding the auto focus of a micro motor
lens without first turning the AF off at the switch. Canon warns not to do that with their micro motor lenses. On the
other hand, their STM (stepper motor) and USM (ultrasonic) lenses both will tolerate manual override of AF without
need to first turn it off. So, if yours is the micro ...
