## DICHOTOMOUS KEY KEYS ANSWER

Nov 28, 2020

[Dichotomous Key Keys Answer](#)

A dichotomous key is a tool created by scientists to help scientists and laypeople identify objects and organisms. Typically, a dichotomous key for identifying a particular type of object consists of a specific series of questions. When one question is answered, the key directs the user as to what question to ask next.

[Dichotomous Key | Definition, Types, & Examples](#)

What IS a dichotomous key? A dichotomous key is a system used by scientists to identify different parts of the natural world. They can be used to identify rocks, plants, trees, birds, reptiles and mammals. Dichotomous keys are set up in a two question format, leading users through a set of choices designed to help them correctly identify the object of their inquisition. It sounds confusing, but it really isn't once you get the hang of it.
