

## ESA SCC SCREENED SURFACE TEMPERATURE SENSOR MODEL 0118MM

Jan 27, 2021

[Esa Scc Screened Surface Temperature Sensor Model 0118mm](#)

ESA/SCC Screened Surface Temperature Sensor Model 0118MM Features • Small size • High reliability • Linear output • Wide temperature range • Screened to ESA 4006 requirements . General Specifications Temperature-269°C to +400°C Resistance (0°C) 100 ohms to 2000 ohms Nominal Alpha 0.00389?/?°C from 0°C to 100°C Insulation Resistance 10 megohms min. with 100 VDC applied ...

The operating temperature range of the ESA/ESCC Space Qualified NTC Thermistor Surface Temperature Sensor is from -60 to +160°C, and possible accuracy of 0.2°C between 0-70°C. A range of resistances at 25°C are available, making these thermistors ideally suited for measuring temperature in Satellite Electric Motors, Gearboxes, Battery Power Packs and Vision Systems.

Lake surface water temperature (LSWT) retrievals from satellite thermal infrared (TIR) sensors onboard numerous satellite platforms provide a spatially comprehensive dataset for lakes larger than ~400 m in diameter in the absence of clouds, and are the primary means used to obtain LSWT where in situ temperature measurements are unavailable. Remote sensing of LSWT began in the 1980's and has ...
