[The New Organon Francis Bacon](#)

The Novum Organum, fully Novum Organum, sive Indicia Vera de Interpretatione Naturae or Instaurationis Magnae, Pars II, is a philosophical work by Francis Bacon, written in Latin and published in 1620. The title is a reference to Aristotle's work Organon, which was his treatise on logic and syllogism. In Novum Organum, Bacon details a new system of logic he believes to be superior to the old ways of syllogism. This is now known as the Baconian method. For Bacon, finding the ...

When the New Organon appeared in 1620, part of a six-part programme of scientific inquiry entitled 'The Great Renewal of Learning', Francis Bacon was at the high point of his political career, and his ambitious work was groundbreaking in its attempt to give formal philosophical shape to a new and rapidly emerging experimentally-based science. Bacon combines theoretical scientific epistemology with examples from applied science, examining phenomena as various as magnetism, gravity, and the ...

The Novum Organum (New Organon) was the second (and the only somewhat complete) part of Sir Francis Bacon's Instauration Magna, published in England in 1620. Because nearly nothing of the other five parts was printed in the Instauration, the whole is often known by the name of the dominant part. In the pocket-sized 1650 edition (pictured right) the name was Novum Organum Scientiarum (New Organon ...

Clearly, The New Organon is about the scientific method, but Bacon himself was openly religious in his philosophical assumptions about the world. So, instead of just writing about the scientific method as a philosophical notion, he actually explains the ethical reasoning behind his passion for experimentation and careful observation. At the end of the day, observation alone is the king of ...
