At a scant 48 pages, CF or Christi Friesen takes you through, in graphic novel format, the crafting of a dragon in polymer clay. The step-by-step instructions are meant to result in creating a focal bead, brooch or sculpture of a whimsical dragon. To be fair, the book does what it promises. However, the idea choices depicted in a two-page gallery spread (pages 28-29) pretty much all rely on a spiral shape idea that only works up to a point.

My go-to brand of clay for most of my projects and the one that I use to teach with in workshops, my Club, and online courses is Premo polymer clay. Premo is a great all-around clay for all kinds of applications; from sculpting, bead making, caning, to mosaics, and everything in between. It has very little color shift from its original in package color and is based on an artist's color ...

Polymer clay can be baked in a regular oven; following the baking instructions provided by the clay manufacturer. It is advised that sculptures should be baked in aluminium foil pans (the kind you get takeaways in) or something similar to protect both your project and your oven – sometimes ovens can brown or burn the top layer of the clay, so covering it will prevent this.
