Understanding the Gender Gap is merely a more detailed look at United States history. Any student that paid attention in class knows the fluctuation in labor force participation rates in women. The average person knows that females to this day are not making the same income of their male counterparts. They know that during the World Wars, increasing numbers of women left the kitchen to go to work and, after the war, were sent right back to their job as homemakers. She is not adding ...

The gender unemployment gap which had persisted in the US until the early 1980s disappeared after 1983 (except during recessions, when unemployment among men has always exceeded that among women). This column argues that the convergence in female and male labour force attachment accounts for most of the closing of the gender unemployment gap.

[Literature On The 'Gender Gaps' - Economic Insight | The ...](#)

In fact, the gap between men and women across health, education, politics and economics widened for the first time since records began in 2006. "Overcoming the biases – unseen or otherwise – that are keeping us from closing the gender gap represents an overwhelming economic as well as moral imperative," Professor Schwab said.

[A brief history of gender \(in\)equality](#)

In terms of economic participation, the gender gap will take 257 years to close (compared to 202 years in the 2019 report). Globally, only 55% of women (aged 15-64) are engaged in the labour market as opposed to 78% of men.
