[Space law bibliography. \(Book, 1961\) \[WorldCat.org\]](#)

Traditionally conceived as a branch of general public international law, space law was originally taken to refer in particular to a handful of United Nations—originating treaties of general scope, UN resolutions, and special multilateral or bilateral agreements specifically addressing space activities (such as establishing international space organizations or the framework for the international space station). Due to the indispensability of the use of radio frequencies for all space ...
